

# Try the Stretch Wrap Selected Specifically for Your TAB Wrapper Tornado

# Get a Tight, Secure Pallet Load with TAB Wrapper Tornado-App

You will feel complete confidence every time a pallet load goes out the door when it's wrapped in our TAB Wrapper Tornado line of stretch wraps. These tough plastic films are tested, manufactured, and optimized for high-speed, 360-degree orbital wrapping so you can apply exactly the right amount of tension and compression strength without concern for rips and tears. These cast stretch films keep your products locked to the pallet, safe and secure.

## TWT-2080 Standard

The workhorse of the line, the puncture- and tear-resistant TWT-2080 delivers an excellent force-to-load ratio packing the strength of an 80-gauge stretch wrap into the thickness of a 65-gauge stretch wrap. Use less film and save on material for reduced costs with every load.

- Quiet unwind from the roll
- High clarity for easy barcode reading beneath the film
- Clever one-sided cling keeps skids from sticking to each other
- 50 rolls per pallet, 20 in. X 5000 ft. per roll, pre-stretched yields 7500 ft. of wrap per roll

For the same high performance as TWT-2080

## Branded Stretch Wrap

As a TAB Wrapper Tornado owner,

your wrapped pallets already look great. Now, up your game with custom branded stretch wrap that sports your logo, phone and Web address.

## TWT-1880 Hand Stretch Wrap

For anyone still manually wrapping by hand, this stretch wrap features proprietary plastic resins with greater puncture and tear resistance with thinner

in extremely cold environments and in facilities where dust is prevalent, use **TWT-2080 CF**. This specialty film keeps its strength, shape and cling in demanding conditions.

- 40 rolls per pallet, 20 in. x 6000 ft. per roll, pre-stretched yields 9000 ft. of wrap per roll

- Instant identification on the job site, in the warehouse and on the truck
- Custom color matching
- Available on all stretch wrap grades

This option offers a savvy way to extend brand imagery through every step of the customer experience.

gauge than other hand wraps. It is crystal clear and releases quietly from the roll every time for smooth, consistent performance.

## TWT-20120 Extra Heavy Stretch Wrap

Take the clarity, puncture and tear resistance, and other properties of the TWT-2080 then bulk up the strength. This heavy-duty, 90-gauge plastic film performs with the same strength as a 120-gauge wrap yet uses less material at far less cost.

- Safely contains the extra heavy pallet loads
- Instills extra confidence against transport risk
- 40 rolls per pallet, 20 in. x 5000 ft. per roll, pre-stretched yields 7500 ft. of wrap per roll

## TWT-20120 Ribbed Stretch Wrap

This custom-developed stretch wrap features a patent-pending approach that boosts the strength beyond extra heavy duty. Boasting proprietary Power Band technology, the TWT-20120 Ribbed applies extreme force to heavy pallet loads that also have odd shapes, awkward centers of gravity or other challenging characteristics.

- Smart replacement for costly, heavy gauge films
- Suitable for bulk building products, machinery, sharp edges
- 40 rolls per pallet, 20 in. x 4000 ft. per roll, pre-stretched yields 6000 ft. of wrap per roll

## Pick a Color, Any Color

Many companies stand out from their competition by using colored stretch wrap to enhance the presentation of the pallet load. Others use black or white for a high level of opacity that hides the contents from prying eyes. All of the TAB Wrapper Tornado stretch wrap grades are stocked in green, blue, black, and clear.

- Additional colors available

**"We love the blue film for the marketing value - it's become a key identifier. And in the event of an on-site error or delivery issue, if it's not wrapped in the blue plastic then we know someone else is responsible."**
