

TAB HOPPERS

Take Control of Your Waste Management

TAB Hoppers are the ultimate solution for managing and transporting scrap materials in your facility. Designed with industrial-grade steel, these assorted-sized scrap metal hoppers provide a durable and efficient way to handle waste, making cleanup quick and easy. With a focus on safety and ease of use, TAB Hoppers are essential for maintaining a clean and organized workspace.

TAB Hopper Benefits

- Self-dumping design ensures safe and efficient unloading
- Reduces time and labor required for waste management
- Reinforced edges and sturdy hinges handle heavy loads
- Compact design for easy maneuvering through tight spaces
- Minimizes risk of workplace injuries

Technical Specifications

- Construction: Industrial-grade steel
- Sizes: Multiple sizes available
- Capacity: Various load capacities to accommodate different scrap types
- Customizability: Let us know your operations needs, and we'll work on a customized TAB Hopper solution for you
- Mobility: Compact design for tight space navigation

Perfect for manufacturing plants, metal fabrication shops, and warehouses, TAB Hoppers streamline the process of collecting and disposing of scrap materials. From metal shavings to larger waste pieces, these hoppers accommodate different types of scrap materials while enhancing safe material handling for your employees.
